Instructor, Randy Schwarz, has over **25 years** of experience doing MCNP calculations. He is also the creator of the MCNP Visual Editor. He has taught classes on the Visual Editor and on MCNP at locations all over the world. His full resume is available on our website.

The class was definitely very useful to me, and I would recommend it to all users and developers of MCNP.

It helped produce input files for MCNP much faster and easier, and probably even more important, the visualization provided by the Visual Editor helps me understand much better the results and the physics of the simulated problem.

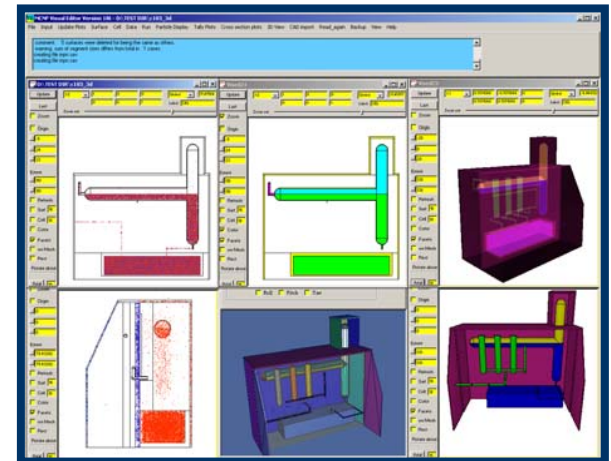

Stepan Mashnik- *Los Alamos National Laboratory.*
On Site Custom class, Los Alamos National Laboratory. Sept. 2008

Eliminate Travel Costs and still get the Training You Need!

For the cost of three students, we will come to you!

Anywhere

Onsite custom class at Risley, UK,

Onsite custom class at LANL

Cost:

Cost is \$400 per day in the US and \$600 per day anywhere else. There is a three student minimum.

The minimum cost for a week long class in your location is :

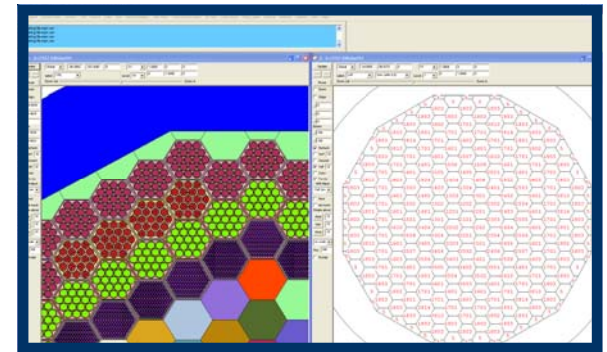

$\$400 \times 3 \text{ students} \times 5 \text{ days} = \$6,000 \text{ (US)}$

$\$600 \times 3 \text{ students} \times 5 \text{ days} = \$9,000 \text{ (outside US)}$

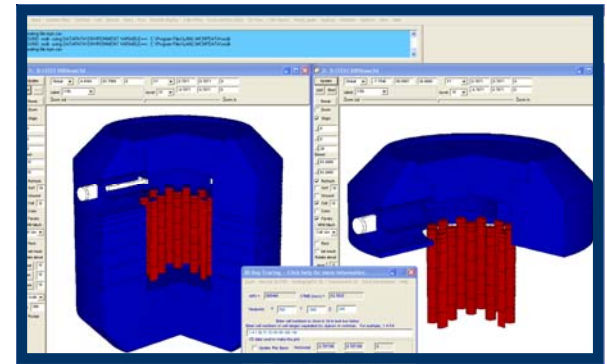

Fees must be paid in US dollars prior to the start of the class.

Any Topic

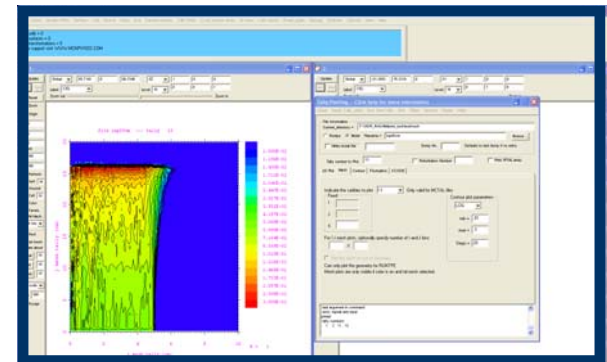

- ◆ Choose which topics to be covered.
- ◆ Custom training materials can be developed for specific onsite requirements.
- ◆ Onsite Consulting available.
- ◆ We can contract with other experts in the field to address highly specialized and diverse needs.
